DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12 and 19-20, drawn to an optoelectronic sensor device with a housing, classified in class 250, subclass 239.
 - II. Claims 13-18, drawn to a mounting device for optoelectronic sensor element, classified in class 250, subclass 216.

The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the optoelectronic sensor of Group I can be utilized with other mounting devices besides that of Group II, and the mounting device of Group II can be utilized with other optoelectronic sensors besides that of Group I. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim
